

# Inventory™

## ONLINE INVENTORY MANAGEMENT SYSTEM

InventoryEdge™ is a web-based inventory management tool that helps you streamline the process of requesting, ordering, issuing and tracking inventory items.

### FEATURES

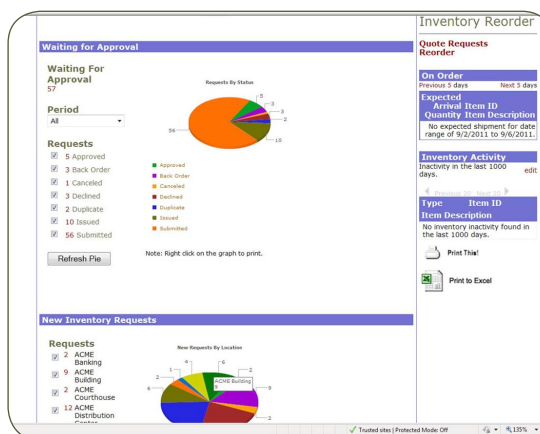

- Manages inventory items by category types: mechanical, custodial, tools, technology, controls and electrical
- Tracks all inventory transactions, including issues, receiving, returns, adjustments, orders and transfers
- Allows inventory to be issued to a location, project, work order or employee
- Records receipt of inventory to pools, including item number, tax, supplier item ID, budget code, invoice and PO number
- Includes inventory catalog for easily viewing, selecting and printing lists of inventory items by category
- Enables requestors to select items from inventory catalogs and submit inventory requests online
- Automatically emails requesters with inventory request receipts and updates of order status changes
- Allows material safety datasheets to be linked to inventory item records
- Includes interactive calendar for reorders, tasks and reminders
- Automatically displays a list of items that need to be reordered, including supplier, suggested reorder quantity and last order date
- Enables users to request quotes for inventory items from multiple suppliers while reordering
- Tracks inventory items stored in multiple pools, including aisle and bin number and reorder points
- Tracks detailed information on inventory items, including unit of issue, contract status, supplier, average or fixed cost, tag number for tools, and back order quantity
- Enables wireless transactions for completion of issue, receipt, transfer, adjustment and returns of inventory items with any handheld, Internet ready device through InventoryWireless™
- Allows inventory to be issued and charged to work orders through MaintenanceEdge integration
- Integrates with Planned Maintenance to track inventory items required for preventative maintenance tasks

InventoryEdge quickly displays current inventory levels for simple reordering, including items below high and low reorder points.

### BENEFITS

- Enables more effective management and control of inventory processes
- Helps improve internal efficiency and communication through online inventory request submission
- Provides site-based inventory management to track inventory levels at any pool or location
- Improves accountability by recording returns of items to suppliers and to inventory pools
- Effectively manages tool inventory, including issues to and returns from employees and locations
- Increases delivery efficiency by tracking routes to inventory pools
- Backed by the industry's only Legendary Service Program
- Easy to learn – unlimited training and support
- Simple – no software to install, maintain or upgrade
- Easy to use – only requires a web browser
- Innovative, on-demand technology – receive software updates instantly
- Affordable – low annual fee for work order service with no licensing limitations
- Reliable – maintained in a 24x7 secure data center, ensuring maximum system uptime

InventoryEdge easily displays the status of all inventory requests, including requests needing approval and requests on back order.

Inventory™

## REPORTING OPTIONS

InventoryEdge includes many reporting options to give you simple “click and go” reporting capability. This provides quick reports and detailed reporting options wherever you are working within the system, based on the information you are viewing at that time. Report options include graphs (bar charts, pie charts and other options) and tabular reports in HTML or PDF format. Additional reports are available in Microsoft Excel format.

### REPORT FEATURES

- Context sensitive reports based on where you are in the system
- Graphs, including bar charts, pie charts, and stacked bar charts
- Reports can be printed in Adobe Acrobat portable document format (PDF) and in Microsoft Excel format

### AVAILABLE REPORTS

- Adjustments
- Budget
- Catalog
- Commodities
- Employees
- Inventory
- Issues
- Locations
- Manufacturer
- Pick Lists
- Pools
- Projects
- Receipts
- Requests
- Returns
- Suppliers
- Tasks
- Tools
- Transfers

**Inventory Wireless™**

**SYSTEM REQUIREMENTS**

- Wireless Network Access
- Wireless Barcode Scanner
- ScanWedge Plug-In

## COST / BENEFIT ANALYSIS

- Reduces inventory shrinkage by 2-3%
- Helps you meet state and local requirements with ease
- Reduces “dead” inventory by 1%
- Reduces inventory requirements by 0.5%
- Helps your maintenance, administrative and custodial teams improve productivity by 5%
- Typical payback is one month or less
- Reduce your total cost of ownership by up to 70% compared to a desktop software system

**Issue Detail By Location**  
All Dates Selected

Location		No Location Specified		Tag Number		Pool From		W/OID		Assign To		Incident ID		Qty Unit of Issue
